

USB-Emulator for MSCD, MSCA and MSCC-Controller

USB-Stick replaces Floppy Disk Drive

One floppy disk drive of a MSCD-, MSCA- or MSCC-Controller will be exchanged by a new ZSK developed USB-adapter. This adapter now enables loading design-data via an USB-Stick.

Characteristics

- It is possible to save up to 100 floppy discs on the USB-Stick
- The floppy disk notation must be marked from 00ZSK to 99ZSK
- Each floppy disc / file can save 64 designs
- You can work simultaneously in the second drive with old DD floppy discs
- It is possible to import DST and DSZ stitch data formats

Parts

Item Number: 396.041.019

Title: Floppy Disc Emulator USB

MSCD-Controller additional requirement
